

STEAL MY CLAUDE SYSTEM

The One-Page Framework That Makes Claude
Create Content Exactly Like You.

By @algowinner01

02 // INTRODUCTION

Why Most People Fail With Claude

Most creators treat Claude like a Google search bar. They type in a generic request: *"Write a post about productivity."*

And they get generic, robotic garbage back. AI-sounding fluff that no one wants to read.

The Truth

Generic prompts create generic outputs. If you put zero effort into the context, Claude will pull from the average of the internet. And the average of the internet is boring.

Why do top creators get incredible results? Because they don't use "prompts". They use **Systems**.

Prompts = Temporary	Systems = Permanent
You start from scratch every time.	You build once, use forever.
Rely on your memory of what works.	Rely on documented rules and constraints.
Outputs are inconsistent.	Consistency beats creativity.

03 // THE BIG IDEA

Claude Is A Mirror

Claude is an intelligence engine with no inherent identity. It only reflects what you show it. It is a mirror.

- **Bad inputs** = bad outputs.
- **Clear identity** = clear outputs.
- **Better context** = better content.

To make Claude sound like you, you must give it a complete psychological profile of your brand.

Average Creator

"Write me a tweet"

04 // SECTION 1

Identity

Before Claude can write *for* you, it needs to know who *you* are. Your identity dictates your authority, your angle, and your unique perspective.

You must clearly define:

- **Who you are:** Your background and expertise.
- **What you do:** Your specific mechanism or service.
- **Who you help:** Your target avatar.
- **What makes you different:** Your unique value proposition.
- **Mission:** Why you are creating content.
- **Vision & Goals:** Where you are taking your audience.

Example: "I am Alex, a content strategist who helps creators build 3R Frameworks (Relatability, Retention, Reach) so they can scale without burning out."

05 // TEMPLATE

Identity Worksheet

Fill this out to form the foundation of your Claude System.

NAME:

PROFESSION:

AUDIENCE:

MISSION:

VALUES:

CONTENT GOAL:

BUSINESS GOAL:

LONG-TERM GOAL:

VOICE SUMMARY:

06 // SECTION 2

Audience

Great content isn't about you. It's about them. If Claude doesn't understand your reader's psychology, your content will fail to convert.

Audience Clarity Matters:

- **Pain Points:** What keeps them awake at 2 AM?
- **Desired Outcomes:** What is their dream state?
- **Language Patterns:** How do they describe their problems?
- **Beliefs & Objections:** What is stopping them from buying or subscribing?

Rule of thumb: If you can describe your audience's problem better than they can, they will automatically assume you have the solution.

WHAT THEY WANT MOST:

WORDS THEY USE:

COMMON OBJECTIONS:

DREAM OUTCOME:

08 // SECTION 3

Voice

Why does Claude sound robotic? Because "professional" is the default setting. You have to force it out of its default state.

Core Voice Categories:

Professional	Corporate, structured, objective.
Friendly	Approachable, conversational, warm.
Aggressive / Direct	Punchy, no-fluff, challenging (Hormozi style).
Educational	Clear, step-by-step, patient.
Storytelling	Narrative-driven, emotional, descriptive.
Minimalist	Short sentences. High impact. No filler.

To create your unique voice, combine 2-3 traits. (e.g., *Direct + Minimalist + Educational*).

COMMUNICATION RULES:

10 // SECTION 4

Content Rules

Creativity needs boundaries. Rules create consistency. By giving Claude strict guardrails, you eliminate the "AI fluff."

Define your parameters:

- **Content Pillars:** The 3-4 core topics you always talk about.
- **The 3R Framework:** Ensure every post hits *Relatability*, *Retention*, and *Reach*.
- **Formats:** Listicles, stories, contrarian takes, teardowns.
- **Structure:** Hook → Value → Retention Mechanism → CTA.

12 // SECTION 5

Examples System

Telling Claude how to write is good. **Showing** Claude how to write is 100x better.

Examples beat instructions every single time. Large Language Models are pattern recognizers. If you feed them a library of your best performing content, they will mimic the exact syntax, cadence, and structure.

The Swipe File Method

Maintain a running document of your highest-performing posts. Paste them into Claude's system context. Call it "Reference Material."

14 // SECTION 6

Content Generation System

Never ask Claude to do everything at once. Use a step-by-step assembly line.

15 // SECTION 7

Repurposing System

Work smart, not hard. One big idea should feed your entire content ecosystem for a week.

1 Core Idea

Format	Output Goal
10 Tweets	Bite-sized insights, quotes, and contrarian takes.
1 Thread	A deep dive step-by-step framework.
5 Reels	Short, punchy scripts optimized for retention.

3 Carousels	Visual learning steps for Instagram/LinkedIn.
1 Newsletter	Long-form storytelling and community building.
1 PDF	A lead magnet to capture emails.

16 // THE ASSET

Master Claude Context Document

This is what you paste into Claude's "Project Instructions" or Custom Instructions.

[SYSTEM CONTEXT: DO NOT IGNORE]

IDENTITY

I am [Name], a [Profession] helping [Audience] achieve [Goal].
My mission is: [Mission].

AUDIENCE PSYCHOLOGY

Target: [Audience]
Pain Points: [Problem 1], [Problem 2]
Desires: [Goal 1], [Goal 2]
Objections: [Objection]

VOICE & TONE

Tone: [Tone]
Style: Short sentences. Actionable. No fluff. No jargon.
Readability: Grade 5 level.
BANNED WORDS: "Unlock", "Delve", "Tapestry", "Crucial", "Bustling".

CONTENT RULES

Structure: Hook → Value → CTA
Formatting: Use lots of whitespace, bullet points, and bold text.

EXAMPLES

[Paste 3-5 of your best posts here]

17 // THE ENGINE

The Master Prompt

Once your context is set, use this prompt to generate content.

```
Act as my personal copywriter.  
Review the System Context provided in the project knowledge.  
  
I want to create a [FORMAT: e.g., Carousel] about [TOPIC].  
  
Here is my raw idea:  
"[Insert messy brain dump here]"  
  
Follow this workflow:  
1. Generate 5 punchy, high-retention hooks.  
2. Wait for me to select one.  
3. Once selected, write the main body following my strict Voice & Tone guidelines.  
Keep sentences under 15 words.  
4. End with a specific CTA driving to [Offer/Link].  
  
Ensure the content matches my examples perfectly. Do not use AI jargon.
```

18 // NEXT LEVEL

Advanced Workflows

Don't stop at basic posts. Build business systems.

- **Research:** Feed Claude 3 PDF industry reports. Prompt: *"Extract the top 5 contrarian insights that my audience doesn't know."*
- **Script Writing:** Feed Claude a viral YouTube transcript. Prompt: *"Deconstruct the pacing and hook structure of this script. Write a new script for my niche using the exact same retention mechanics."*

- **Lead Generation:** Prompt: *"Based on my audience's pain points, brainstorm 10 high-value, 1-page PDF lead magnet ideas they would instantly download."*
- **Audience Analysis:** Paste 50 comments from your competitors' videos. Prompt: *"Analyze these comments and tell me what the market is frustrated with right now."*

19 // TROUBLESHOOTING

20 Common Claude Mistakes

Mistake	Why It Happens	The Fix
1. Sounds robotic	Default AI tone	Ban words like "delve", "unlock"
2. Too wordy	Lack of constraints	Rule: "Sentences < 15 words"
3. Missing the point	Vague prompt	Define the exact outcome first
4. Boring hooks	Asking for 1 option	Ask for 10 variations, pick best
5. Inconsistent voice	No examples provided	Feed 3-5 swipe file examples
6. Formatting mess	No structure rules	Specify line breaks and bolding
7. Generic advice	No personal context	Input your Identity Document
8. Weak CTAs	Assuming Claude knows	Give the exact link/action needed
9. Hallucinations	Lack of factual input	Provide the raw data yourself
10. Over-explaining	"Expert" syndrome	Rule: "Assume reader knows basics"
11. Emoji overload	Default social setting	Rule: "Max 1 emoji per post"
12. Corny jokes	Bad humor settings	Rule: "Dry, practical tone"
13. Skipping steps	Prompting too much	Use a 1-by-1 step workflow
14. Sounding desperate	Bad sales framing	Rule: "Authoritative, not needy"

15. Forgetfulness	Context window full	Start a new chat thread
16. Bad pacing	Long paragraphs	Rule: "1-2 sentences per paragraph"
17. Irrelevant hashtags	Default behavior	Rule: "No hashtags"
18. Academic tone	Complex vocabulary	Rule: "Write at 5th grade level"
19. Weak conclusions	Summarizing	Rule: "End with action, not summary"
20. Giving up	Accepting first draft	Always ask for a revision

20 // CONCLUSION

BUILD ONCE. USE FOREVER.

Execution Checklist:

- ☐ Complete Identity worksheet
- ☐ Complete Audience worksheet
- ☐ Complete Voice worksheet
- ☐ Complete Rules worksheet
- ☐ Complete Examples library
- ☐ Compile Master Context Document
- ☐ Execute Master Prompt

Your Next Step
